

Project Charter

Project Name	Journey to Becoming a Junior Data Analyst
Project Description	This project will equip participants with the essential skills for delivering an excellent level of Data Analysis and support while gaining globally recognized certifications to endorse their commitment and knowledge. This 14-week project covers a wide variety of fundamental technical and project management skills. By the end of the project participants will be able to: • Develop proficiency in using spreadsheets for data analysis, including cleaning, wrangling, and analyzing data, and working with pivot tables. • Create data visualizations and dashboards using Excel and Cognos Analytics. • Visualize data using Python libraries, including Matplotlib • Develop working knowledge of Python language for analyzing data using Python libraries like Pandas and Numpy, and invoke APIs and Web Services • Use SQL for database management, including advanced SQL techniques and accessing databases using Python. • Apply technical skills required to effectively gather, wrangle, mine, and visualize data, and apply soft skills for working with stakeholders and storytelling with data to engage an audience • Showcase efficiency in Data Analytics through the successful completion of a cumulative Capstone Project • Explore and use Generative AI tools for different stages of the Data Analysis process. • Understand AI workloads, responsible AI principles, and Azure Machine Learning capabilities, including computer vision, NLP, and generative AI solutions. • Gain a comprehensive understanding of the Agile project management lifecycle, including key techniques, deliverables, and practical application through presentations, exercises, and real-life examples. For the project to be successful, adequate time management and organizational skills are essential. Dedicate at least an hour to meeting your project deadlines and deliverables each day outside of regular work hours. Individual team members are encouraged to participate and work collaboratively outside of regularly scheduled working days. Collaboration within varying Agile Teams is a wonderful way to participate in a more in-depth discussion with peers to transfer knowledge, and increase motivation while enhancing teamwork, project management, and communication skills.
Purpose	

The overall purpose of the project is to ensure that individual participants accepted into the program exceed requirements that will enable them to not only earn in-demand certifications and opportunities for employment but to sustain themselves long-term in a meaningful digital career.

Team Members		
Name (Fill out the Names)	Role	
	Program Manager	
	Career Specialist	
	Instructor	
	Participant (You)	
Risks and Constraints	Milestones	
Failure to abide by and meet timelines in this document and all agreements as stated in the Service Level Agreement (SLA) aka Program Agreement	Week	Task
	Week 2	Coursera Course 1 to 3 Complete
	Week 5	AI900 Certified
	Week 14	IBM Data Analyst Professional Certificate certified

Expected Goals / Deliverables			
Projected Week of Completion	Project Focus	Course # / Focus	Course Module Completion/ Deliverables
Orientation	What is Data Analytics	Course 1: Introduction to Data Analytics	Course 1, Module 1
Orientation	The data Ecosystem	Course 1: Introduction to Data Analytics	Course 1, Module 2
Orientation	Gathering and Wrangling Data	Course 1: Introduction to Data Analytics	Course 1, Module 3
Orientation	Mining and Visualizing data and Communicating results	Course 1: Introduction to Data Analytics	Course 1, Module 4
Orientation	Career Opportunities and Data Analysis in Action	Course 1: Introduction to Data Analytics	Course 1, Module 5
Orientation	PD: Resume Part 1: Introduction and professional Summary	N/A	- Draft Resume - Professional Summary
1	Project Management	N/A	Kanban Board using Trello
1	Introduction to Spreadsheets for Data Analysis	Course 2: Excel Basics for Data Analysis	Course 2, Module 1

1	Getting Started with Using Excel Spreadsheet	Course 2: Excel Basics for Data Analysis	Course 2, Module 2
1	Cleaning & Wrangling Data Using Spreadsheets	Course 2: Excel Basics for Data Analysis	Course 2, Module 3
1	Analyzing Data Using Spreadsheets	Course 2: Excel Basics for Data Analysis	Course 2, Module 4
1	Final Project	Course 2: Excel Basics for Data Analysis	Course 2, Module 5
1	PD: Resumes Part II: Key Words Accomplishment Statements Applicant Tracking Systems	N/A	Complete Resume
1	Visualizing Data Using Spreadsheets	Course 3: Data Visualization and Dashboards with Excel and Cognos	Course 3, Module 1
1	Creating Visualizations and Dashboards and Spreadsheets	Course 3: Data Visualization and Dashboards with Excel and Cognos	Course 3, Module 2
2	Creating Visualizations and Dashboards with Cognos Analytics	Course 3: Data Visualization and Dashboards with Excel and Cognos	Course 3, Module 3
2	Final Project	Course 3: Data Visualization and Dashboards with Excel and Cognos	Course 3, Module 4
2	PD: Personal Branding: LinkedIn	N/A	LinkedIn Profile
2	AI Overview	AI900	Module 1
3	Computer Vision	AI900	Module 2
3	Natural Language Processing	AI900	Module 3
3	PD: Professional Branding: In Person	N/A	Elevator Pitch
4	Document Intelligence and Knowledge Mining	AI900	Module 4
4	Generative AI	AI900	Module 5

4	• PD: Stress and Time Management • N/A • • Goal Setting & Action Plan		
4-5	• AI900 Practice Exam • AI900 Exam		
5	PD: Business Communication: Written & Verbal	N/A	• Email draft, challenging Conversation Case Study Scenario
6	Python Basics	Course 4: Python for Data Science and AI	• Course 4, Module 1
6	PD: Job Search, Resume Tailoring & AI	N/A	• Job Tracker
6	Python Data Structures	Course 4: Python for Data Science and AI	• Course 4, Module 2
7	Python Programming Fundamentals	Course 4: Python for Data Science and AI	• Course 4, Module 3
7	Working with Data in Python	Course 4: Python for Data Science and AI	• Course 4, Module 4
7	PD: Interviews part 1	N/A	• Greatest weakness
7	Analyzing US Economic Data and Building a Dashboard	Course 4: Python for Data Science and AI	• Course 4, Module 5
8	Analyzing Stock Performance and Building a Dashboard	Course 5: Python Project for Data Analysis	• Course 5, Module 1
8	Introduction to Databases and Basic SQL	Course 6: Databases and SQL for Data Science	• Course 6, Module 1
8	PD: Interview part II	N/A	• Star stories
8	Advanced SQL	Course 6: Databases and SQL for Data Science	• Course 6, Module 2
8	Accessing Databases Using Python	Course 6: Databases and SQL for Data Science	• Course 6, Module 3
9	PD: MOCK INTERVIEWS 1:1 with Staff	N/A	• Complete Mock Interview

9	Course Assignment	Course 6: Databases and SQL for Data Science	Course 6, Module 4 & 5
10	Importing Datasets	Course 7: Data Analysis with Python	Course 7, Module 1
10	Data Wrangling	Course 7: Data Analysis with Python	Course 7, Module 2
10	PD: Cover Letters & References - Self-Directed	N/A	Draft Cover Letter
10	Exploratory Data Analysis	Course 7: Data Analysis with Python	Course 7, Module 3
11	Model Development	Course 7: Data Analysis with Python	Course 7, Module 4
11	Model Evaluation	Course 7: Data Analysis with Python	Course 7, Module 5
11	Final Assignment	Course 7: Data Analysis with Python	Course 7, Module 6
11	Module 1: Build a Foundation	Course 11: Data Analyst Career Guide and Interview Preparation	Course 11, Module 1
11	Module 2: Applying and Preparing to Interview	Course 11: Data Analyst Career Guide and Interview Preparation	Course 11, Module 2
11	Module 3: Interviewing	Course 11: Data Analyst Career Guide and Interview Preparation	Course 11, Module 3
11	Module 4: Course wrap-up	Course 11: Data Analyst Career Guide and Interview Preparation	Course 11, Module 4
11	Introduction to Data visualization Tools	Course 8: Data Visualization with Python	Course 8, Module 1
12	Basic and Specialized Visualization Tools	Course 8: Data Visualization with Python	Course 8, Module 2
12	PD: Problem Solving	N/A	Project progress predicament
12	Advanced Visualizations and Geospatial Data	Course 8: Data Visualization with Python	Course 8, Module 3
12	Creating Dashboards with Plotly and Dash	Course 8: Data Visualization with Python	Course 8, Module 4
12	Final Assignment	Course 8: Data Visualization with Python	Course 8, Module 5

13	Data Collection	Course 9: Data Analyst Capstone Project	Course 9, Module 1
13	Data Wrangling	Course 9: Data Analyst Capstone Project	- Course 9, Module 2
13	Exploratory Data Analysis	Course 9: Data Analyst Capstone Project	Course 9, Module 3
13	Visualization	Course 9: Data Analyst Capstone Project	Course 9, Module 4
13	PD: Resourceful/Resilience	N/A	- Resourcefulness Application Activity
13	Building a Dashboard	Course 9: Data Analyst Capstone Project	Course 9, Module 5
13	Final Assignment - Data Analyst Capstone	Course 9: Data Analyst Capstone Project	Course 9, Module 6
14	Data Analytics and generative AI	Course 10: Generative AI Enhance your Data Analytics Career	Course 10, Module 1
14	Use of generative AI for Data Analytics	Course 10: Generative AI Enhance your Data Analytics Career	Course 10, Module 2
14	Final Project & Exam	Course 10: Generative AI Enhance your Data Analytics Career	Course 10, Module 3
Note: The items listed are not intended to be final, as items can be added, removed, or modified at the discretion of the NPower Canada Staff.
